

Brass

Semi-finished tapes (CuZn37 and CW 508L) in small quantities, as well as punched and shaped parts in accordance with customers' drawing.

Variants

Semi-finished tapes and strips: M-Tech[®]F products can be used as the standard product for small quantities.

Self-adhesive versions and special delivery shapes are possible in this area at the request of the customer.

Peelable laminated shims for tolerance compensation in accordance with LN 29557.

These M-Tech[®]L semi-finished sheet products are manufactured by Georg Martin to produce intermediate shims in accordance with customer specifications. Lot sizes from one unit.

When necessary, these sheets are also offered as sales articles.

Punched brass parts are also available in self-adhesive, backing in accordance with customer specifications, from lot sizes of one unit.

Inquiries can also be made about formed parts. Because of our own construction department with affiliated tool-making facility, we are capable of producing the desired solutions.

Restrictions

Semi-finished products: Our scope of delivery does not include any pipes, large plates or treaded goods. Deliveries weighing a ton or more are not usually part of our normal business.

Our processing technology focuses mainly on punching and forming, as well as various adhesion and lamination techniques. Compression and rolling technology are not used.
