

## **M-Tech<sup>®</sup>F special scissors**

**The M-Tech<sup>®</sup>F special scissors can be used for all materials with thickness of up to 0.10 mm. The cranked and ergonomic shape means that they are well-suited to the M-Tech<sup>®</sup>F programme: they can assist in improving handling and on-the-job safety.**

### **Variants**

Normal sheet scissors.

### **Scope of product definition**

Thicker material can be cut with commercial electric or manual sheet scissors, nibblers or cutter tools. If required, gate shears can also be used.

### **Field of application**

M-Tech<sup>®</sup>F special scissors can be used for material up to approx. 0.10 mm thick.

### **Handling**

The cranked M-Tech<sup>®</sup>F special scissors are suited for material up to approx. 0.10 mm thick. Stronger tools are necessary for thicker materials. Care should be taken when working with foil tapes and blanks in order to avoid accident.
